## PROFESSIONAL SUMMARY

Java Full-Stack Developer with hands-on experience building REST APIs and full-stack applications using Spring Boot, React.js, MySQL, and Oracle SQL. Strong analytical and problem-solving skills with a solid foundation in OOP, Data Structures & Algorithms (150+ LeetCode problems), JUnit 5, and Mockito. Proficient in Microsoft Excel, Word, and PowerPoint. Passionate about building scalable backend systems and seeking Software Engineer or Graduate Engineer Trainee opportunities.

## TECHNICAL SKILLS

- **Languages:** Java, SQL, JavaScript
- **Backend:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate, JDBC, REST APIs
- **Frontend:** React.js, HTML5, CSS3
- **Databases:** Oracle SQL, MySQL, PostgreSQL
- **Testing & DevOps:** JUnit 5, Mockito, Docker, Docker Compose, Git, GitHub Actions, Maven, Postman, Swagger/OpenAPI
- **CS Fundamentals:** Data Structures & Algorithms, OOP, Collections Framework, Multithreading, MVC Architecture, SDLC
- **Productivity & Office Tools:** Microsoft Excel (Pivot Tables, Charts, Basic Formulas), Word, PowerPoint

## EXPERIENCE

**Java Full-Stack Developer Intern – (Tekcogent Solutions Pvt.Ltd,Chennai)** **Feb 2026 – May 2026**

- Developed and deployed full-stack CRUD applications using Spring Boot, React.js, and MySQL, structuring backend services around MVC architecture for maintainability and scalability.
- Engineered JWT-based authentication and role-based authorization to secure REST API endpoints and enforce access control across application modules.
- Built centralized exception-handling and input-validation layers to standardize API error responses and improve overall service reliability.
- Collaborated in an Agile development environment using Git for version control, code reviews, and feature integration.

## PROJECTS

**Inventory Management System** *Spring Boot · PostgreSQL · Docker · JUnit 5*

- Built a layered Controller–Service–Repository architecture using Spring Boot, Hibernate, and PostgreSQL to develop 15+ REST APIs for inventory management, including CRUD operations, pagination, filtering, and stock tracking.
- Implemented DTO-based validation, centralized exception handling, and audit logging to ensure reliable request processing and maintain a complete history of inventory updates.
- Integrated JWT authentication and role-based authorization to secure REST APIs and restrict access based on user roles.
- Containerized the application with Docker and Docker Compose, enabling one-command setup across development environments.
- Documented REST APIs using Swagger/OpenAPI and deployed the application on Render with PostgreSQL for cloud-based access and testing.

**Sorting Visualizer** *React.js · JavaScript · DSA*

- Built an interactive React.js visualizer for five sorting algorithms (Bubble, Selection, Merge, Insertion, Quick Sort), rendering real-time animations to show how each algorithm reorders elements step by step.
- Designed a reusable Hook-based component architecture with centralized state management to control array size, animation speed, and algorithm switching.

## EDUCATION

**B.E., Information Science Engineering – JNNCE, Shivamogga** **2022 – 2026**
*CGPA: 7.75 / 10*

**Diploma – Tool & Die Making – Government Tool Room & Training Centre (GTTC)** **2020 – 2023**
*Score: 84.04%*

**Secondary School (SSLC) – Bharatiya Vidya Samsthe, Honnali** **2010 – 2020**
*Score: 71.0%*

## CERTIFICATIONS & ACHIEVEMENTS

- **Data Structures and Algorithms Using Java** – NPTEL (2025)
- **The Complete SQL Bootcamp** – Udemy (2025)
- Solved **150+ LeetCode problems** in Data Structures & Algorithms.
- Proficient in Microsoft Excel, Word, and PowerPoint for data analysis, report preparation, documentation, and presentations.
